

Client Case Study Sheet

JMP

Construction & Property Consultants

Project: New Build Housing, Rothesay
Client: Fyne Homes
Value: £1.2 Million

A'Chrannag or "the crows nest" is a spectacular seven storey round tower designed by Aberdeen Architect Gokay Deveci. It is considered to be one of the most energy efficient buildings in Europe and features triple glazed windows and 450mm thick cavity filled walls. Heating is minimal with only background electric heating provided keeping running costs down to an incredibly low level.

It has received numerous awards including a nomination for the Stirling Prize, a Saltire Award Commendation, RIBA Award and RIAS 10/10 - Buildings That Made A Difference. We acted as Quantity Surveyor for the Housing Association and provided full pre and post contract services.
